

# Old Havana

Hand-drawn map of Havana, Cuba

The following map manipulates raster data by taking a hand-drawn hometown drawing of Havana, Cuba, geo-referencing said map, and superimposing data of the Old Havana center onto the drawing using ArcGIS software. Information such as the Old Havana boundary, restored buildings, historic buildings and plazas help shape a narrative illustrating the extent to which the city has preserved its architectural heritage, largely restoring existing hotel structures that generate revenue.
